## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by PCT WO 01/94820 to **Ransom**.

The **Ransom** reference discloses a pipe segment (20) having a pair of ends, a back-up flange (30) placed over an end of the pipe, a socket stub (28) placed on the end of the pipe and affixed to the pipe. A liner (10) is received within the pipe. It is disclosed that the liner is fitted to each end of the length of the pipeline, being pulled through the pipeline from one end, trimmed to length and its ends are secured and sealed to the outer ends of the socket stub, thereby forming a gasket. The socket stub end has a predetermined vent hole (40) having an inlet opening located behind the socket and an outlet opening located behind the stub end, whereby permeated gases trapped between the pipe and the liner can be vented there through.

***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Brittain et al. '449 and '499, Ledoux et al., McMillan et al. and Graves et al., are pertinent to Applicant's invention in disclosing flanged pipe ends, the ends including vent openings.
